

The RD1014 is standard made in Merbau, it is standard primed, either translucent for lacquering, cream for light coloured paint or grey for dark coloured paint (the images are only for showing the possibilities of painting or lacquering)

Availability:
Appr. 9 to 11 weeks

Description

The RD1014 is a solid timber joinery door with a cast alloy insert and an open-able window on the inside.

The cast alloy insert is primed for painting.

The wood we use is Merbau which is also known as Kwila, we do not use veneer on them.
